Dotcom Bubble

The Dotcom Bubble was a historic excessive growth (excessive assumption) of economy that occurred roughly between 1995 and 2000. It was also a period of extreme growth in the usage and adaptation of the Internet as well.

In the late 1995, there was a tremendous development in US equity investments in Internet-based companies. During the dotcom bubble, the value of equity markets grew exponentially with the NASDAQ composite index of US stock market rising from under 1000 points to more than 5000 points.

Dotcom Burst

The Nasdaq-Composite stock market index, fell from 5046.86 to 1114.11. This is infamously, known as the Dotcom Crash or Dotcom Burst. This began on March 11, 2000 and lasted until October 9, 2002. During the crash, thousands of online shopping companies, like as Pets.com failed and shut down. Some companies like Cisco, lost a large portion of their market capitalization but survived, and some companies, like Amazon declined in value but recovered quickly.

15.4 Classification of E-Commerce Business models

Business organizations, Consumers and Government (also called as Administrations) are the major parties in the E-Commerce. Sometimes Employees (Informal workers) also indulge in this system. Based upon the entities involved in transaction, E-Commerce is classified into the following categories. The model in which the government plays as an entity is termed as e- Governance. See Figure 15.6
