EXERCISE

String Functions

AIM

To create and execute String Functions in PHP

Procedure

1. Start Xampp server (Apache)
2. Goto virtual path folder (C:\xampp\htdocs)
3. Create funtion.php file and type the program
4. Execute the program on your Web browser using by this URL link

(http://localhost/ funtion.php)

```
<html>
<body>
<?php
// Displays the length of the string
echostrlen(“Hello world!”);
//Counting number of words in a String
echo str_word_count(“Good Morning All”);
// Reversing a string
echo strrev(“welcome”);
```
