10
EXERCISE

Converting Word to Digit

AIM

Write a PHP program to convert word to digit.

Procedure

1. Start Xampp server (Apache)
2. Goto virtual path folder (C:\xampp\htdocs)
3. Create convert.php file and type the program
4. Execute the program on your Web browser using by this URL link

(http://localhost/convert.php)

```
<html>
<body>
<?php
functionword_digit($word) {
   $warr = explode(';',$word);
   $result = '';
foreach($warr as $value){
switch(trim($value)){
case 'zero':
            $result .= '0';
break;
case 'one':
            $result .= '1';
break;
case 'two':
```
