communication, presentation and Input/ output interactions of text, video, image, graphics and audio.

The term multimedia comprises of two words, "multi" and "medium". Multi refers to many i.e. at least two. Media is the plural of medium. Therefore multimedia is an integration of many types of media like text, graphics, images, audio, animation, video etc on a single medium in the same information unit.

1.3 Components of Multimedia

Multimedia has five major components like text, images, sound, video and animation. They are explained in detail below:

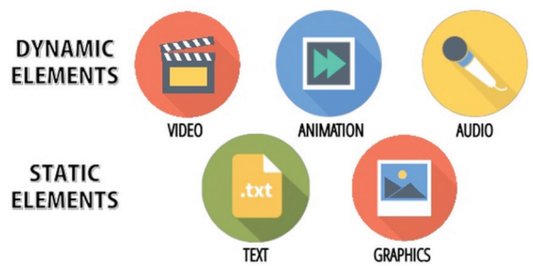

Figure: 1.2 Components of Multimedia

1.3.1 Text

Text is the basic component of multimedia and is the most common way of communicating information to other person. Even though multimedia includes images, video, audio and graphics, Text is the basic component used in multimedia.

Figure: 1.3 Text

Static Text

Static text, the text which will remain static as a heading or in a line, or in a paragraph. The words are given along with the images to explain about the images. In static text the words will either give information or support an image or an video.

Hypertext

A hypertext is a system which consists of nodes, the text and the links between the nodes, which defines the path the user need to follow for the text access in non-sequential ways. The author of the working system created this structure. The user is permitted to define their own paths in more sophisticated hypertext systems. The user is provided with the flexibility and choice to navigate in hypertext. In a multimedia product, text is used to convey the information and must be placed at appropriate position in order to obtain the well-formatted sentences and paragraphs. The readability of the text depends on the spacing and punctuation. The message communication is more appropriate with improved Fonts and styles.
