

CHAPTER 01

Lathe

X5JUL6

Learning Objectives

- Students to learn about the construction of Lathe and its parts, structure and its operation.
- To understand the feed mechanism of tumbler gear and apron in lathe.
- To know about the types of lathe and its details, difference between capstan and turret lathe and work holding devices in lathe.
- To understand the cutting speed, feed and depth of cut in a lathe, various types of operation and taper turning methods and thread cutting operation.

"Panivudaiyan insolan aadhal oruvarku
Aniyalla matru pira". –Kural 95

Humility with pleasant speech to man on earth, Is choice adornment, all besides is nothing worth.

CONTENTS

1.1 Introduction
1.2 Turning
1.3 Structure of a lathe
1.4 Main parts of a lathe
1.5 Feed mechanisms
1.6 Tumbler gear
1.7 Apron
1.8 Spindle Mechanism
1.9 Stepped cone pulley mechanism
1.10 Back gear mechanism
1.11 Gear box mechanism
1.12 Types of lathe
1.13 Differences between capstan and turret lathe
1.14 Specification of lathe
1.15 Work holding devices used in a lathe
1.16 Cutting speed, feed and depth of cut in lathe
1.17 Tools used in a lathe
1.18 Operations performed in a lathe
1.19 Taper turning
1.20 Thread cutting
