

CHAPTER 08

Hydraulic Equipments

2TJKVS

Learning Objectives

- Students to understand the hydraulic equipments of pump, cylinder and valves in detail.
- To understand the types of pumps, working method and its applications
- To understand the differences between centrifugal pump and reciprocating pump.
- To understand the hydraulic circuit for shaping machine.

Kaalaththinal seytha nandri siridheninum
Gnaalathin maana perithu. —Kural 102.

A favour conferred in the time need, though it be small(in itself), is (in value) much larger than the world.

CONTENTS

8.1 Introduction
8.2 Hydraulic pumps
8.3 Properties of positive displacement pump
8.4 Properties of Non-positive displacement pump.
8.5 Types of centrifugal pump
8.6 Types of Reciprocating pump
8.7 Types of Rotary pump
8.8 Centrifugal pump
8.9 Reciprocating pump
8.10 Difference between centrifugal and a reciprocating pump
8.11 Rotary pump
8.12 Hydraulic motor
8.13 Hydraulic cylinder
8.14 Hydraulic valve
8.15 Hydraulic circuit for shaping machine
8.16 Advantages of hydraulic drive over mechanical drive
