

CHAPTER 10

Automation and Robotics

F5PALZ

Learning Objectives

- Students to know about, how the automatic machine is working without man, working principle and their automatic technology.
- Students to know about how the Robotic machine is working as man are man's activities.

Ennenba enai ezhuththenba ivvirandum
Kannenba vaazhum uyirkku. –Kural 392

Letters and members are the two eyes of human being.

CONTENTS

10.1 Introduction of Automation
10.2 Types of Automation
10.3 Need for industrial Automation
10.4 The advantages of Automation
10.5 Applications of Automation
10.6 Elements of Automation
10.7 Introduction of Robotics
10.8 Definition of Robotics
10.9 Objectives of industrial Robotics
10.10 Advantages
10.11 Three main components of Robots
10.12 Asimov Laws of Robotics
10.13 Need of Robotics
10.14 Types of Robots
10.15 Applications of Robotics
10.16 Parts of Robots
10.17 Materials used for Robots
