b. Based on geometry

i. Cartesian coordinate system

ii. Cylindrical coordinate system

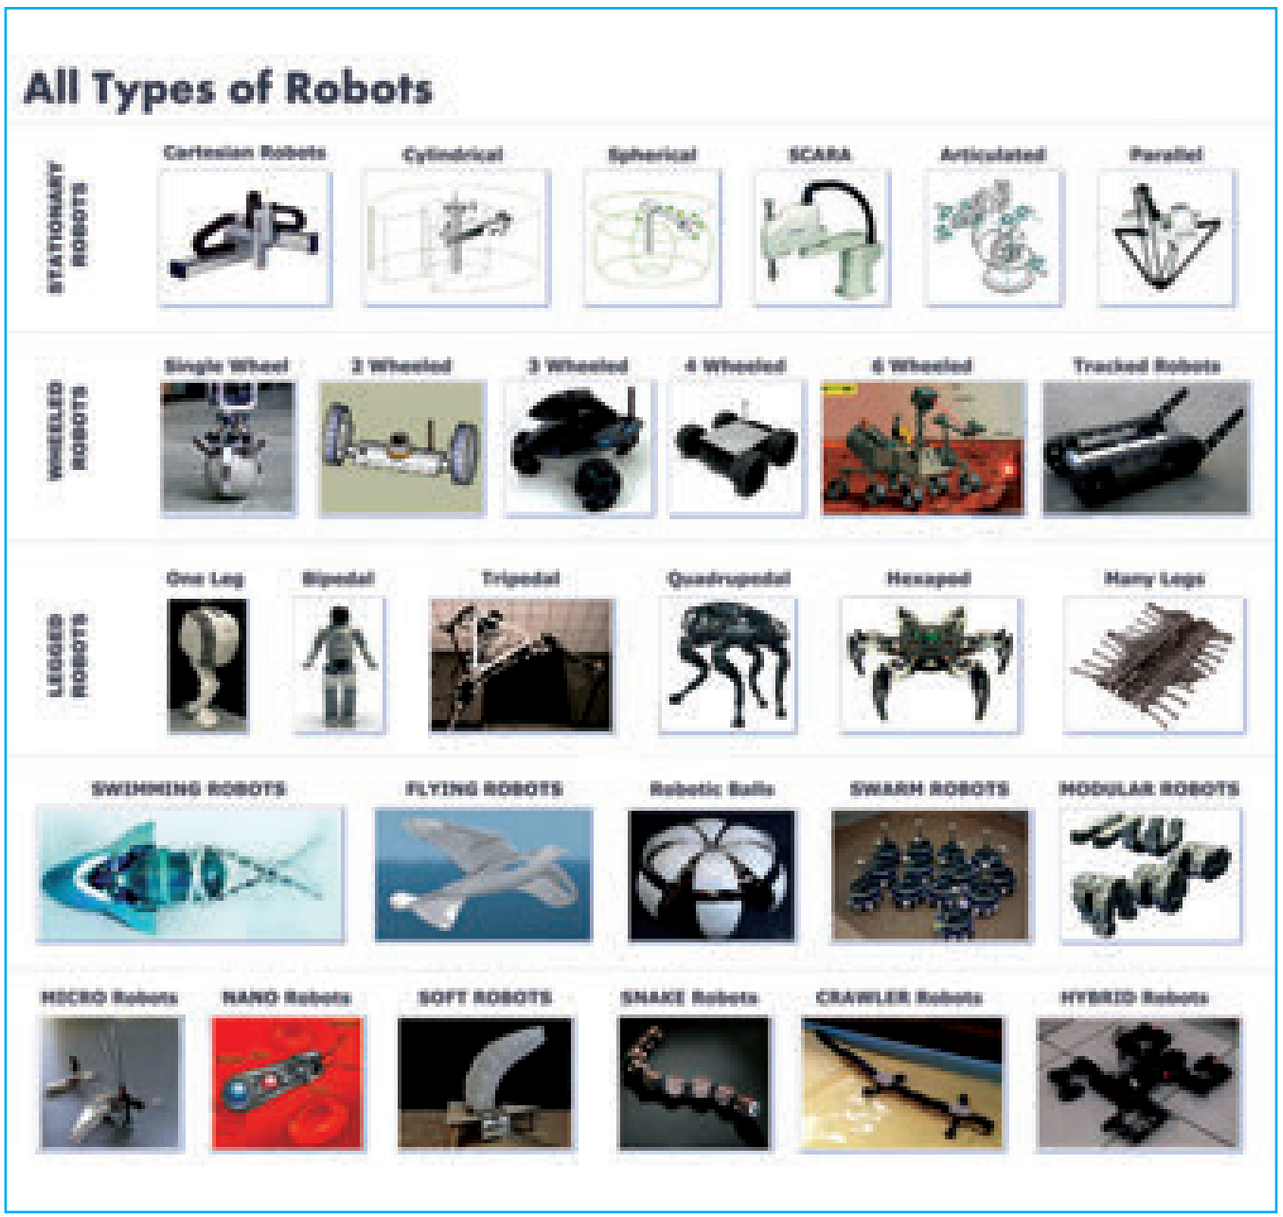

iii. Spherical coordinate system

## 10.15 Applications of Robotics

1. Most robots today used to do repetitive actions or jobs considered too dangerous for human
2. It is ideal for going into a building that has a possible bomb
3. It is also used in factories to build things like cars, candy bars and electronics

## 10.16 Parts of robots

1. The control system is – also known as the "brain" of Robot which is run by a computer program.
2. Mechanical parts – motors, pistons, grippers, wheels, and gears that
