

CHAPTER 02

Drilling Machine

DFURIC

Learning Objectives

- Students to understand how to drill the holes in work pieces, different types of machining operations related to drilling process and various uses of drilling process in industries and other fields in future life.

Thaam inburuvadhu ulagin purakandu
Kaamuruvar katrarinh dhaar. –Kural 399

When the learned see that their learning contributes to make the world happy. They are pleased and pursure their learning more.

CONTENTS

2.1 Introduction of Drilling Machine
2.2 Drilling Method
2.3 Construction of a drilling machine
2.4 Types of drilling machines
2.5 Portable drilling machine
2.6 Sensitive drilling machine
2.7 Up-right drilling machine
2.8 Radial drilling machine and its special features.
2.9 Gang drilling machine
2.10 Multi – spindle drilling machine
2.11 Deep – hole drilling machine
2.12 Size of a drilling machine
2.13 Drill spindle assembly
2.14 Work – holding devices.
2.15 Tools used in a drilling machine
2.16 Twist – drill nomenclature
2.17 Tool – holding devices
2.18 Drilling machine operations
2.19 Cutting speed. Feed and depth of cut
2.20 Safety precautions
