

3D Structure of a drilling machine

2.4 Types of drilling machines

Drilling machines are manufactured in different types and sizes according to the type of operation amount of feed. Depth of cut, spindle speeds, method of spindle movement and the required accuracy.

The different types of drilling machines are

1. Portable drilling machine (or) Hand drilling machine.
2. Sensitive drilling machine
3. Upright drilling machine
   a) Round column section
   b) Box column section
4. Radial drilling machine
5. Gang drilling machine
6. Multi – spindle drilling machine
7. Deep hole drilling machine.
   a) Vertical
   b) Horizontal
8. Automatic drilling machine.

Types of Drilling Machines

1. Portable Drilling Machine (or) Hand Drilling Machine
2. Bench Drilling Machine (or) Sensitive Drilling Machine
3. Upright Drilling Machine
   a. Box column
   b. Round column
4. Radial Drilling Machine
5. Gang Drilling Machine
6. Multi–Spindle Drilling Machine
7. Deep Hole Drilling Machine
   a) Vertical
   b) Horizontal
8. Automatic Drilling Machine

2.5 Portable drilling machine

The portable drilling machine is shown in the given figure.

Portable drilling machine can be carried and used anywhere in the workshop. It is used for drilling holes on work pieces in any position. Which is not possible in a standard drilling machine. The entire drilling mechanism is compact and small in size and so can be carried anywhere. This type of machine is widely adapted for automobile built – up work. The motor is generally universal type.
