ii. **Block Printing:** Block made of wood or metal are engraved with designs. Each block prints only one colour. The blocks are dipped in dye solution. Only the raised portion in the blocks picks up the dye and is then pressed on the fabric, forcing the dye to be printed on the surface.

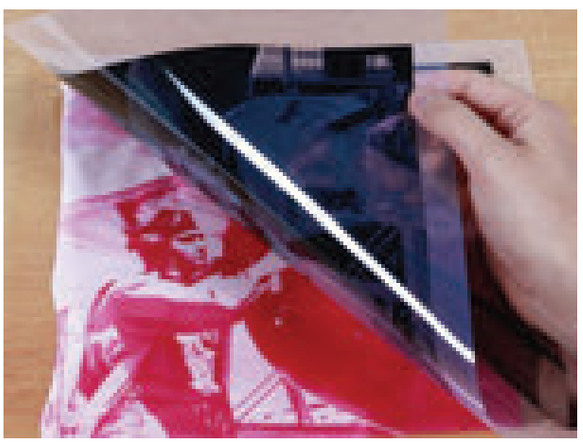

Block Printing

iii. **Duplex Prints:** Duplex print are produced by modified direct roller print equipment. The design is made by a machine, which is set up to print on both the face and back of the fabric.

Duplex Print

iv. **Photographic Prints:** Photographic prints are made similar to that used in making photograph. A negative is placed on the fabric and light is transmitted to it and the design is developed. The fabric is washed and the design is as permanent as a photo.

Photographic Prints

v. **Transfer Printing:** Transfer printing involves heat and pressure. The dye in the desired design, is first printed onto a special paper. The paper is laid on the fabric and the design is transferred by sublimation. The dye
