10. Polyester is referred as
    a) dupont
    b) work hose
    c) cellulose acetate
    d) acrylic

II. Write Very Short Answers (2 marks)

1. Name any two natural fibres?
2. Name the method of removing seeds from dried cotton. How is it done?
3. Is polyester man-made or natural? How is it made?
4. Name the process by which nylon is manufactured?
5. Do you agree that permanent stitches are used in stitching? If so what are they and where it is used?
6. Tacking makes the dress beautiful. How?
7. Name the fibre that is given weighting. Why is it given to the fabrics?
8. Give some uses of nylon fabrics.
9. Name the fibre which is made by combining two chemical and it is a polymer.

III. Write Short Answers (3 marks)

1. Cotton has multiuse in our daily life Explain?
2. Can Nylon be manufactured in industry. Mention the raw materials used for Nylon fabric.
3. What are the uses of even tacking?
4. Name the strongest stitch among stitches and give reason.
5. Name the stitch used to cover the edges. How is it done?
6. Write a simple stain removal procedure followed at home?
7. Batik is done on the fabric to make it more attractive-Explain?
8. Define dyes Give two example of dyes?
9. Vat dyes are applied to cellulose and man made fibres- Justify?
10. What is block printing?
11. Care and maintenance of fabric is a concern of consumers-Explain
12. Why are direct dyes appllied to cotton?

IV. Write in detail (5 marks)

1. Describe the manufacturing of silk fibre?
2. Discuss the different types of direct printing methods?
3. How can natural fibres be classified? Explain their sources.
4. What is the difference between man made fibres and natural fibres?
5. Do you prefer natural or synthetic fibres? Give reason for your selection.
6. Finishing is done on fabric to make the product complete. Explain the various finishing methods?
7. A Mechanic's clothes have lot of grease stain. What are the methods you would suggest to remove those stains?
