c) The site in the neighbourhood of a sea commands pleasant sea breeze. But one disadvantage is that sea breeze carries with it a thin spray of salty water, which corrodes all iron articles.

vi. Legal Characteristics

a) The legal description of the plot and the exact location of the plot must be known.

b) The site should be a freehold land without encumbrance.

c) A legal advisor should be consulted, the place surveyed and the boundaries marked on.

5.2.2 Principles of Organising Rooms While Planning a House

The principles to be considered for organising rooms while planning a house are aspect, prospect, privacy, grouping, roominess, furniture requirements, circulation, flexibility, sanitation and practical consideration.

i. Aspect

Aspect is the arrangement of doors and windows on the outside walls of a house which allows good breeze, sunshine and a good view of the nature. Aspect is also needed from hygienic point of view.

- With careful placement of windows, it is possible to admit sun's rays into any desired room. Kitchen should face the eastern side so that the morning sun's rays can purify air.
- Bed rooms should have southern aspect-either southeast or south west to facilitate enjoyment of good breeze.
- The living room can be north-east or south-east in its aspect.

ii. Prospect

It is the impression that the house creates on a person who views it from outside. It must be attractive in appearance, modern, cheerful and comfortable.

- A beautiful window, carved pillars, modern design on the walls and roof may add to the charm of the house.

iii. Privacy

Privacy is of two kinds-privacy of the entire house from the road side; privacy of each room from other rooms and from the entrance.

- Privacy from outside can be gained by planting trees and growing creepers or having a compound wall.
- Privacy within the house can be obtained by proper arrangement of doors and windows.
- Privacy to bedrooms, toilets, water closets and dressing room is of utmost importance.
