and by specifying the number of replicas for a service in our docker-stack.yml:

```
service:
  deploy:
    replicas: 2
```

It's sad to say, but our Docker adventures (in this book at least) are coming to an end. In the next—and final—chapter, we'll draw things to a close, and give you some helpful pointers for continuing your journey with Docker, especially when it comes to deploying to production.
