packages for Rails apps, 20
Postgres gem, 75
Rails gem, 11
Redis gem, 64
RSpec, 97
Selenium, 103
verifying, 5
VirtualBox, 156
Yarn, 89
instances
creating, 157, 174
creating in cloud, 174
creating machines, 155–160
getting images into, 159
initializing as swarm manager, 175
listing, 157
on DigitalOcean, 173–178
scaling services, 169–171
stopping when deploying to cloud, 186
Swarm, 160–171
IntelliJ, 110
intermediate images, 24
invalidated caches, 37
IO streams, attaching, 49
IP addresses
binding Rails server to, 28
instances, 161, 167, 175
managers, 184
running containers, 29
testing with Capybara, 105
-it option, 15

J

JavaScript
front-end options, 87–93
system tests, 104–109
testing, 101–109
Jekyll, 194
Joyent, 197

K

key label, 42
kill, 68, 124
killing, containers, 52, 68, 124
kubectl, 137
Kubernetes
about, 142
autoscaling, 133, 191
CaaS platforms, 137–140
continuous deployment, 192
Google Compute Engine, xv
limiting resources, 190
vs. Swarm, 132

L

LABEL instruction, 42
labels, maintainer, 41
Lambda, 140
latest tag, 32, 150
layers
automatic downloading, 8
caching, 9
Linux, *see also* file ownership
about, xvii
Docker architecture, 14
file ownership basics, 200
installing Docker, 4–5
named volumes location, 84
publishing ports, 27
viewing tests with VNC, 106
listing
containers, 9, 52
directory contents, 12
images, 25
instances, 157
networks, 63
running containers, 9, 52
services deployed to a swarm, 166
stopped containers, 10
tasks, 168
load balancing, 171, 192
logs
container logs, 53–54
follow output option, 54
JavaScript testing, 103
Rails, 54, 146
resources on, 54
turning off logging driver, 103
logs command, 53
ls, 12, 157, 166

M

macOS
about, xvii
Docker architecture, 14
file ownership, 199
installing Docker, 4
named volumes location, 84
publishing ports, 27
Screen Sharing, 104, 106
viewing tests with VNC, 106
machines
configuring Docker CLI, 158–160
creating, 155–160, 176
creating in DigitalOcean, 176
maintainer label, 41
managers
deploying to AWS, 184
deploying to DigitalOcean, 178
initializing instances as, 175
orchestrators, 133
memory, limiting resources, 190
metadata and labels, 42
metrics, 194
microservices, 141
Microsoft Azure
Container Instances, 141
Container Registry, 153
Kubernetes Service, 139
provisioning IaaS, 135
Middleman, 194
migrations, database, 80, 163
Minitest
about, 95
skipping as default, 12
mkdir, 11
monitoring, operations role, 130
mounting
gem cache volume, 114–118
local files to compile assets, 92
named volumes, 82
volumes, 13, 21, 47, 50, 82, 199
volumes and file ownership, 199
volumes with Compose, 47, 50

N

--name option, 60
named volumes
gem cache volume, 116
location, 84
storing persistent data, 82–84
