using, 160–171
visualizing containers, 179–183
system
pruning, 56
system tests, 99–101, 104–109
system prune, 56
system testing, 99–101, 104–109

T

-t option, 11, 13, 32, 151
tag, 31–33
tagging
default tag, 32
images, 31–33, 48, 150–151
multiple tags, 32
registries, 150
repository name tag, 150
task definitions, 137
tasks, 167–171
TCP, 63, 171
terminal emulator option, 13, 15
Terraform, 136
testing, 95–111
about, 95
creating test database, 78
debugging, 109
first test, 97–99
headless, 102, 108
JavaScript, 101–109
Minitest as default, 12
setup, 96
system tests, 99–101, 104–109
viewing tests, 103, 106
throwaway containers
IDs, 24
removing, 10, 24
twelve-factor app principles, 193

U

up, 47–50, 63, 73
update, 170
updating
auto-updating with React, 93
orchestrators' role, 132
packages and caching issue, 37
services, 170
users
default user for containers, 11
Postgres, 80, 84

V

-v option, 11, 13
value (labels), 42
/var/run/docker.sock file, 180
version command, 5
versions
dependency management, xiv
Docker, 3
Node.js, 89
Rails, 11
rolling back in deployment, 130
version numbers in Compose file, 46
versioning images, 32, 48
virtual machines
vs. containers, xv, 6
creating, xiv
Docker advantages, xiv
VirtualBox, 155–172
about, 155
creating machines, 155–160
installing, 156
resources on, 156
scaling services, 169–171
Swarm, 160–171
virtualization
with Hyper-V, 5, 156
with VirtualBox, 155–172
visualizer tool, 179–183
VNC, viewing tests, 103, 106
volume command, 82
volumes
creating with Compose, 47
gem cache volume, 114–118
locations, 84
mapping, 50
mounting, 13, 21, 47, 50, 82, 199
mounting named, 82
named, 82–84, 116
storing persistent data, 81–84
volumes property, 50, 82

W

--webpack option, 89
--webpack=react option, 89
webpack_dev_server, 90–92, 117
webpacker
compiling assets, 90–92
gem cache volume, 117
JavaScript front-end options, 87–93
WEBPACKER_DEV_SERVER_HOST, 92
Windows
creating machines, 156
Docker architecture, 14
file ownership, 199
Hyper-V, 156
named volumes location, 84
publishing ports, 27
viewing tests with VNC, 106
WORKDIR, 22
workers
creating, 176
joining swarm, 177
orchestrators, 133

Y

-y option, 20
Yarn, 88
-yqq option, 20
