```
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    android:id="@+id/main"
    android:layout_width="match_parent"
    android:layout_height="match_parent">

    <androidx.fragment.app.FragmentContainerView
        android:id="@+id/hikes_nav_host"
        android:name="dev.hotwire.navigation.navigator.NavigatorHost"
        android:layout_width="match_parent"
        android:layout_height="match_parent"
        app:defaultNavHost="false" />

</androidx.constraintlayout.widget.ConstraintLayout>
```

Next, add a **BottomNavigationView** sibling node to render the tab view. We'll use the **app:layout_constraint*** properties to make sure it sticks to the bottom of the screen and fills the full width.

ch04_09/android/app/src/main/res/layout/activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    android:id="@+id/main"
    android:layout_width="match_parent"
    android:layout_height="match_parent">

    <androidx.fragment.app.FragmentContainerView
        android:id="@+id/hikes_nav_host"
        android:name="dev.hotwire.navigation.navigator.NavigatorHost"
        android:layout_width="match_parent"
        android:layout_height="match_parent"
        app:defaultNavHost="false" />

»   <com.google.android.material.bottomnavigation.BottomNavigationView
»       android:id="@+id/bottom_nav"
»       android:layout_width="match_parent"
»       android:layout_height="wrap_content"
»       app:labelVisibilityMode="labeled"
»       app:layout_constraintBottom_toBottomOf="parent"
```
