ch05_19/ios/App/Views/MapView.swift

```
    struct MapView: View {
        var viewModel: HikeViewModel

        var body: some View {
            Map {
»               if let hike = viewModel.hike {
»                   Marker(hike.name, coordinate: hike.coordinate)
»               }
            }
        }
    }
```

Run the app and check out the awesome, dynamic map of the…entire country, as shown in the screenshot.

Huh? Any idea what's going on?
