Chapter 8

Build Android Bridge Components with Kotlin

In the previous chapter, you learned how to add bridge components to your iOS app. This chapter mirrors that for Android—you'll learn how to build a native button component to submit forms and navigate to new pages. Here's an example of what the sign-in screen will look like before (left) and after (right) working through this chapter:

A heads up that even if you're only working through the Android side of things, you'll still need to read through Chapter 7, *Build iOS Bridge*
