```
                contentColor = Color.Black
            )
        ) {
»           iconName?.let {
»               Text(
»                   text = it,
»                   fontFamily = FontFamily(Font(R.font.material_symbols)),
»                   fontSize = 28.sp,
»                   style = TextStyle(fontFeatureSettings = "liga")
»               )
»           } ?: Text(title)
        }
    }

    // ...
```

These image names can be found for each icon back on the Google Fonts page, under Icon name when selecting an icon.

Run the app and sign in. You'll see the Add button replaced with a nice little plus sign. And when you visit a hike page, a pencil will replace the Edit button.
