

Sadly, the upload fails with an error message complaining that `CFBundleIconName` is missing, as shown in the second screenshot. We need an app icon to upload builds to App Store Connect. Close this dialog and do just that.

Add an App Icon

Open `Assets` under the `Resources` folder. Click AppIcon from the middle column—notice there's nothing there, as shown in the third screenshot. We need a 1024x1024 pixel image.
