Download the App on TestFlight

Go grab your iOS device and open the email from Apple inviting you to the TestFlight beta—it will come from no_reply@email.apple.com. Tap the big View in TestFlight button. If you don't yet have TestFlight installed, follow the link to do so. Then, accept the invitation and download the app to your device. Once downloaded, TestFlight will open to your app's landing page (see the screenshot on the right, shown).

Testers can use the TestFlight app to leave feedback for you and receive notifications of new builds.

OK, the moment we've been waiting for…go ahead and launch the app!
