```
    }

    // ...

    dependencies {
        // ...
        implementation("androidx.compose.ui:ui-tooling-preview")
        implementation("com.google.maps.android:maps-compose:6.1.0")
        implementation("org.jetbrains.kotlinx:kotlinx-serialization-json:1.8.1")
»       implementation(platform("com.google.firebase:firebase-bom:33.12.0"))
»       implementation("com.google.firebase:firebase-messaging")
        debugImplementation("androidx.compose.ui:ui-tooling")
        testImplementation(libs.junit)
        androidTestImplementation(libs.androidx.junit)
        androidTestImplementation(libs.androidx.espresso.core)
    }
```

Then, add the Google Services plugin to the module's **build.gradle.kts**.

ch10_51/android/build.gradle.kts

```
    // Top-level build file where you can add configuration options common to all
    // sub-projects/modules.
    plugins {
        alias(libs.plugins.android.application) apply false
        alias(libs.plugins.kotlin.android) apply false
        alias(libs.plugins.compose.compiler) apply false
        id("org.jetbrains.kotlin.plugin.serialization") version "2.0.0" apply
    false
»       id("com.google.gms.google-services") version "4.4.2" apply false
    }

    buildscript {
        dependencies {
            classpath(
                "com.google.android.libraries.mapsplatform" +
                        ".secrets-gradle-plugin:secrets-gradle-plugin:2.0.1"
            )
        }
    }
```

Finally, add the notification permission to the manifest.
