Build a Hotwire Native Android App

Start by creating a new project by opening Android Studio and clicking New Project in the welcome window. Or, click File → New → New Project….

Select the Phone and Tablet category from the left and then the Empty *Views* Activity template (not Empty Activity at the top). Click Next.

Enter “Hiking Journal” for the Name and “com.masilotti.hikingjournal” for the Package name. Like the organization identifier on iOS, Google Play uses
