

To fix this, add the same CSS class `d-hotwire-native-none` in `shared/_header.html.erb` to hide the `<h1>` tags:

ch02_09/rails/app/views/shared/_header.html.erb

```
    <% content_for :title, title %>

    <div class="container">
»     <h1 class="d-hotwire-native-none my-4 pt-md-4"><%= title %></h1>
    </div>
```

Ah, much better.

Custom Variants for Tailwind CSS

The `native.css` approach works great if you only need to add a few styles manually. But if you want something a bit more dynamic, and if you are
