Add Missing Elements

You've now hidden the web-based navigation bar from Hotwire Native apps, as shown in the screenshot. But there were valuable links in there that are no longer accessible!

It's no longer possible for users of your app to sign in and out. And you've effectively removed the links to the Hikes and Hikers pages. Let's add back those sign-in and sign-out links. We'll address the Hikes and Hikers navigation links when we explore native tabs in Chapter 4, *Add a Native Tab Bar*.

First, add a new style (`d-hotwire-native-block`) to `native.css` that *shows* elements only on Hotwire Native apps:

ch02_11/rails/app/assets/stylesheets/native.css
