6. (d)	7. (b)	8. (b)	9. (b)	10. (b)
11. (b)	12. (a)	13. (d)	14. (a)	15. (b)
16. (a)	17. (c)	18. (b)	19. (a)	20. (c)

II 30. $r = 1$

III 38. $n = 10$

40. $r = 0.85$

41. $(\alpha\beta) = -50$, The given data is inconsistent

IV 44. $r = 0.95$ it is highly positively correlated

45. $r = 0.847$ wages and cost of living are highly positively correlated.

46. $r = 0.8081$. Statistics and mathematics marks are highly positively correlated.

47. $\rho = 0.8929$ price of tea and coffee are highly positively correlated.

48. $\rho = 1$ (perfect positive correlation)

49. $\rho = 0.8$

50. ρ = -0.905 x and y are highly negatively

51. ρ = -0.78 marks in Tamil and English are negatively correlated.

52. ρ = +0.733

53. There is a negative association between attacked and vaccinated. There is a positive association between not attacked and not vaccinated. Hence vaccination can be regarded as a preventive measure of Hepatitis B.
