29. Construct (1) Laspeyre's index, (2) Paasche's index, (3) Marshall-Edgeworth index, and (4) Fisher ideal index for the following data taking 2014 as base year

Items	year 2014		year 2015	
	Price	Quantity	Price	Quantity
A	6	50	10	56
B	2	100	2	120
C	4	60	6	60
D	10	30	12	24
E	8	40	12	36

30. Construct Marshall–Edgeworth price index number for the following data taking 2016 as base year

Commodity	year 2016		year 2017	
	Price	Quantity	Price	Quantity
A	4	58500	6	62000
B	3.5	15630	5.5	13050
C	3	26230	5	25000
D	2.5	11360	4	10000
E	2	30000	3	31500

31. A popular consumer co-operative store located in a labour colory reported the average monthly data on prices and quantities sold of a group of selected items of mass consumption as follows.

Items	Jan 2015		Jan 2018	
	Prices ₹ Per kg	Quantity sold kg	Prices Per kg	Quantity sold kg
Veg oil	26	40	31	45
Sugar	28	90	32	100
Rice	16	120	19	20
Wheat	15	110	18	130

Compute the following indices.

(a) Laspeyre's price index for 2018 using 2015 us base year.

(b) Paache's price index for 2018 using 2015 as base year.

32. From the data given, in problem. obtain the following

(a) Laspeyre's quantity index for 2018 using 2015 as the base year.

(b) Paasche's quantity index for 2018 using 2015 as the base

(c) Compute Index number using Fisher's formula and show it satisfies time reversal test and factor reversal test

Commodity	Base year		Current year	
	Price	Quantity	Price	Quantity
A	10	12	12	15
B	7	15	5	20
C	5	24	9	20
D	16	5	14	5
