Characteristics

The Project work is an assignment to be carried out by students during the course, either individually or in a group under supervision of the teacher. A brief written report of this work is an integral part of the assignment. Thus the project work is a *complete assignment*. . It contains the levels of planning, execution, analysis and reporting the work done.

Advantages

1. Formulating a real world problem with statistical perspective, student acquires application knowledge through the completion of the project.
2. Project works provides the knowledge about systematic collection of data, organization of ideas and an ability to analyze them with in a stipulated time. The following intangible benefits will be derived on completion of the project work.
    - ❖ Development of the capacity to identify and correctly specify statistical problem.
    - ❖ Being aware of the assumptions and the steps to validate them.
    - ❖ Ability to interpret results.
    - ❖ Development of report writing skill.
3. It pave the way for interaction with the respondents, the ability to fit into a team, provides co-operation and provides interaction among the students and between the teachers.
4. It gives them a sense of involvement and commitment.

9.1 DESIGNING A PROJECT

There are Six stages while doing a project work.

- ❖ Stage 1 - Identify the topic of the project work
- ❖ Stage 2 - Define Your Goals. Formulate Objectives / Hypothesis
- ❖ Stage 3 - Develop Your project work Plan.
- ❖ Stage 4 - Collection of Data and creating a data file.
- ❖ Stage 5 - Analyze Data
- ❖ Stage 6 - Report writing

Stage 1 . Fixing the project work topic

The first and foremost stages of any project work is identifying the topic of the project work. The sources for selecting the topic include (i) individual experiences, (2) personal conversation, (4) day-to-day practical experience, (5) Social problems (6) Politics like opinion poll.

The criteria for fixing the topic depends about data availability, time period to complete a research, availability of expertise.
