1. What is study about?
2. Why is the study being made? (***Motivation of the study)***
3. Where will the study be carried out? (***Scope of coverage)***
4. **What type of data is required**? *(Survey data / Experimental data)*
5. What are instruments needed? (Questionnaire / Instruments)
6. From whom can be required data be found? (***Where to collect?*** ***Target group?)***
7. What periods of time will study include? (***How many times to collect***?)
8. What techniques of data collection will be used? (***Which method to follow?)***
9. How the data will be analyzed?

9.3 QUESTIONNAIRE DEVELOPMENT PROCESS

Questionnaire Format

It consists of two parts namely (1) Questions and (2) Responses.

Questions	**RESPONSES**
	
1. Name 2. Age (in completed years) 3. Sex	---------- _____ Years 1. Male 2. Female

Once the researcher has decided on the specific type of questions and the response formats, the next task is the actual writing of the questions. The wording in specific questions always poses significant time investment for the researcher. The general guidelines are useful to bear in mind during the wording and sequencing of each question.

Characteristics of a questionnaire

- The wording must be clear
- Select words so as to avoid biasing the respondent
- Consider the ability of the respondent to answer the question
- Create the willingness of the respondent to answer the questions.
