RESEARCH REPORT FORMAT

Preliminaries,

Chapter I INTRODUCTION

Introduction about the research area : Broad Area

Problem Selection : Selection of the topic

Objectives of the study

Hypothesis of the study

Methodology of the study:

- Sample Design
- Source of Data - Instrument used for extracting information from the sample units
- Pre test- Reliability and validity of the data collection instrument and Pilot study
- Description of variables
- Frame work of analysis
- Significance of the study
- Period of study
- Scope of Study
- Limitations of the study
- Scheme or layout or organization of the report.

Chapter II METHODOLOGY / DATA COLLECTION

Chapter III ANALYSIS AND INTERPRETATION

Chapter IV SUMMARY AND CONCLUSION
