12th standard – Statistics Practical

The syllabus for 12th standard practical are the following problems should be taken from the textbook examples or Exercises or relevant problems in real life situation. The question paper consists of two sections. Each section contains five questions. The students should answer four questions choosing two from each section.

Section A

1. Tests of Significance of a Proportion and Equality of Proportions based on Z-Statistic.
2. Tests of Significance of a Mean and Equality of Means based on Z-Statistic
3. Tests of Significance of a Mean based on t-Statistic.
4. Tests of Significance for equality of Means of two Independent Populations. (Independent samples 't' test)
5. Paired t-Test for dependent samples.
6. Test of Significance for Equality of Population Variances based on F-Statistic.
7. ANOVA for One Way Classification.
8. ANOVA for Two Way Classification.
9. Chi-square Test for Independence of attributes.
10. Chi-square Test for Goodness of fit.

Section B

1. Computation of Pearson's Correlation Coefficient.
2. Computation of Spearman's Rank Correlation.
3. Computation of Yule's coefficient of association.
4. Construction of Regression Equations.
5. Construction of Index Numbers.
6. Trend by the Method of "Moving Averages" of a Time series data.
7. Trend by the Method of "Least Squares" of a Time series data.
8. Seasonal Indices by the Method of "Simple Averages" of a Time series data.
9. Computation of CBR, ASBR, CDR,ASDR.
10. Construction of Life Table for Vital Statistics.
