The Outline of the each of the problems is as follows.

1. Aim or purpose:
2. Selection of the suitable statistical tool
3. The following procedure is to be followed for the *SECTION A* and *SECTION B*.

SECTION B: Problem solving type

- Formula
- Substitution of data in the formula
- Calculation
- Result

SECTION A: Hypothesis testing

Test procedure

- Null Hypothesis H_0
- Alternative Hypothesis H_1
- Level of Significance α
- Test Statistic
- Calculation of test statistic value using sample data
- Critical value from the table
- Decision

Include graphs / diagrams wherever needed
