Red/Green/Refactor practice, 8, 94
as term, xv
wording, 109
Bernhardt, Gary, 37, 68, 288
BigDecimal class, 49
bin/rake spec, 300
--binstubs option for Bundler, 294, 300
--bisect option, xvi, 91
block matchers, 187, 203–209, 311, 313
blocks
aliasing custom matchers, 218
cautions, 255
configuring mocks, 162
configuring verifying doubles, 248
dynamic predicate matchers, 195
satisfy matcher, 196
sharing example groups, 127
test doubles, 248, 255, 261–263
“Boundaries”, 68
Braintree, 283
branches, conditional, 41, 64
brittle specs
acceptance specs, 41
avoiding with composable matchers, 178
costs, 37
decoupling from changeable details, 267
flexible constraints, 258
include matcher, 197
test doubles, 265
bundle exec rspec, 293, 300
Bundler
CodeRay installation, 19
Expense Tracker app, 47, 294
installing, 47
using, 293
Bundler.require, 293
by modifier, 208
by_at_least modifier, 208
by_at_most modifier, 208
byebug debugger, 146

C

calendar matcher exercise, 214
call counts, 259, 261
Capybara, 302, 304
cash cow example, 271–274
CGI (Common Gateway Interface), 284
chain method, 223
chaining
with chain method, 223
with null objects, 239
yielding multiple values from test doubles, 252
change matcher, 207–209, 311
CI (continuous integration), 249, 290, 295
circuit breaker, 259
class_double, 278
class_double method, 244
classes
class methods, 277
connecting test subject to environment with test doubles, 274–276
contexts as, 51
creating custom matchers, 220, 225–228, 230
example groups as, 11, 120
matchers as, 222
metadata, 133
name issues, 247–248
nonexistent, 51
as partial doubles, 275, 277
passing class name to describe, 108
running unit specs selectively, 131
subclassing, 276
verifying doubles, 244
cleanup
custom formatters, 155
hooks, 10, 114, 116
partial doubles, 242
test doubles, 242
code
for this book, xiv, xvii, 220, 292
marking third-party code as pending, 29
mocking third-party, 281–290
running selectively, 131
sharing conditionally, 140
sharing setup, 8–13, 112–130
sharing with modules, 157
syntax highlighting, 19, 47
writing wished for, 51
CodeRay, 19, 47
coffee example, 16–30
collections
comparing, 56
empty, 9
higher-order matchers, 197–202
matchers, 180, 197–202, 309
sorting, 213
color
failure reports, 7
syntax highlighting, 19, 47
command line
configuring RSpec, 145–156, 165
Rails, 300
setting defaults, 149
command methods and mocks, 238
Common Gateway Interface (CGI), 284
comparison operator matchers, 191–194, 308
composable matchers
about, 54, 87
custom matchers, 224, 226–227
development, xvi
dynamic predicate matchers, 195
Expense Tracker app, 54, 87, 96
failure messages, 179–180
nested data structures, 96, 178
satisfaction matchers, 196
using, 176–180
compound matcher expressions, 176, 178, 219, 224, 226
compound matchers, negating, 219
conditional branches, 41, 64
