Next, we'll narrow our focus to the HTTP routing logic, and test it in isolation from the rest of the system.

Exercises

1. Skim through the introductory Sinatra documentation to get a feel for how apps are structured.[11]
2. Read "Testing Sinatra with Rack::Test" to learn the testing approach favored by the Sinatra team.[12]
3. Remember the spec_helper.rb file that RSpec generated for you? Read through a few of the comments and try enabling some of the commented-out settings.
