state of Jammu and Kashmir. India has not exploited any of the waters of the Indus cascade and has only partially exploited the waters of the Chenab and Jhelum. It is because of the ineptitude and the lack of will on the part of the Government of India that it has never realised the fact that it is sitting on a very potent weapon whose deterrent capacity is enormous. It could curtail the enormous consumer surplus being enjoyed by Pakistan in terms of the excess water that it has been using for the last 59 years. Here the argument is not even referring to the encroachment of water from Pakistan's share but only the full legal utilisation of India's share.

After the US invasion of Afghanistan following the 9/11 attacks, the US put collateral pressure on Pakistan to cease cross-border terrorist raids into Jammu and Kashmir by terror groups like the Jaish-e-Mohammed and the Lashkar-e-Taiba.[30] November 2003 saw a surprise offer of ceasefire across the LoC by the then Pakistan President Musharraf. Vajpayee travelled to Islamabad in January 2004 and the ceasefire was implemented and terrorism took a back seat. The borders became quiet and illegal traffic across them ceased. During the next four years, Musharraf and Manmohan Singh, who succeeded Vajpayee as the Prime Minister of India in May 2004, tried to thrash out a deal on the state without changing the borders. Before the deal could be struck after four long years of complex negotiations, Musharraf abruptly resigned in August 2008 as the President of Pakistan. Before this, he resigned as the Army Chief in November 2007 and was succeeded by Gen. Ashfaq Parvez Kayani.

The Truth Behind Kishenganga

Taking advantage of the peace on the borders, in 2007, India's National Hydroelectric Power Corporation (NHPC) and its sub-contractor, Hindustan Construction Company started construction of the US$864 million run of the river hydroelectric project on the Kishenganga River near the Gurez Valley in Bandipore district of the state, located within line of sight of the LoC. The Kishenganga River is as the Neelum River in POK. Although construction of this project started in 2007, it halted in 2011 as Pakistan
