The increase was particularly sharp in the remittance facilities provided to co-operative institutions, which increased from ₹32 crores in the year ended September 1955 to ₹600 crores in the year ended September 1967. Similar facilities availed of by commercial banks increased from ₹488 crores to ₹1,345 crores during the same period.[7]

Deposits and Advances

The effectiveness of the bank depended on the size of its resources and their deployment. Since its establishment, the bank's deposit resources increased by ₹760 crores from ₹188 crores on July 1, 1955, to ₹948 crores on June 28, 1968, and its advances increased by ₹668 crores from ₹113 crores to ₹781 crores. Though the bank was in the public sector, the private sector contributed to a major portion of its deposits and was also the major beneficiary of credit extended by it. Deposits of government and semi-government institutions and of public sector enterprises constituted, in March 1967, 28 percent of the bank's deposits, while advances to them constituted 16 percent of the bank's total advances.

The success of a bank in mobilizing saving of the community is indicated in the pattern of its deposits. At the end of March 1967, personal deposits accounted for 90 percent of the total deposit accounts and 39 percent of total deposits. Naturally, in view of this, fixed deposits and savings deposits increased much more rapidly than current accounts; the rate of growth since 1955 in these three categories of deposits was 756 percent, 362 percent, and 193 percent respectively.[8]

With the increasing emphasis placed on industrialization, many new industries were established. The bank provided financial accommodation required for this expanding industrial sector. The bank's advances to industry increased from ₹49.3 crores in December 1955 to ₹532.2 crores in April 1968. As a proportion of the total advances, industrial advances increased from 49.5 percent to 71.3 percent over the period. Advances to trade and commerce and other purposes also increased in absolute amounts but their proportions in the total went down. An increasing proportion of the industrial advances went to basic industries such as engineering, iron and steel, fertilizers and chemicals, cement and mining, and quarrying. Between December 1955 and April 1968, the amount of advances to these industries
