address to the shareholders of the Investment Corporation of India in 1963, made a fervent plea for allowing unit trusts to be set up in the private sector, subject to regulation. He argued that the concentration of resources made for narrower markets and exaggerated movements in their prices. Shroff was proved wrong when the UTI became the colossus it did, but he was also proved right about the weakness of government controlled fund management when the UTI ran into big problems in the mid-1990s.[26]
