democratisation',[26] there is no mention of Bhagat Singh's thinking, even though he regarded precisely these groups as being in the vanguard of a transformative Indian revolution against colonial rule. Indeed, while Chibber's excellent work goes on to refer to 'virtually every important leader in the anticolonial tradition through the twentieth century, from Sun Yat-Sen and Hon-Chi Minh to Franz Fanon and Che Guevara',[27] there is strangely no mention at all of Bhagat Singh or of his forebears. Bhagat Singh had well developed revolutionary ideas, ranging from education to health care to jail reform and universal suffrage amongst others, which were as extensive as any other long before people like Hon-Chi Minh, Franz Fanon and Che Guevara came onto the scene with their ideas in the middle of the twentieth century.
