

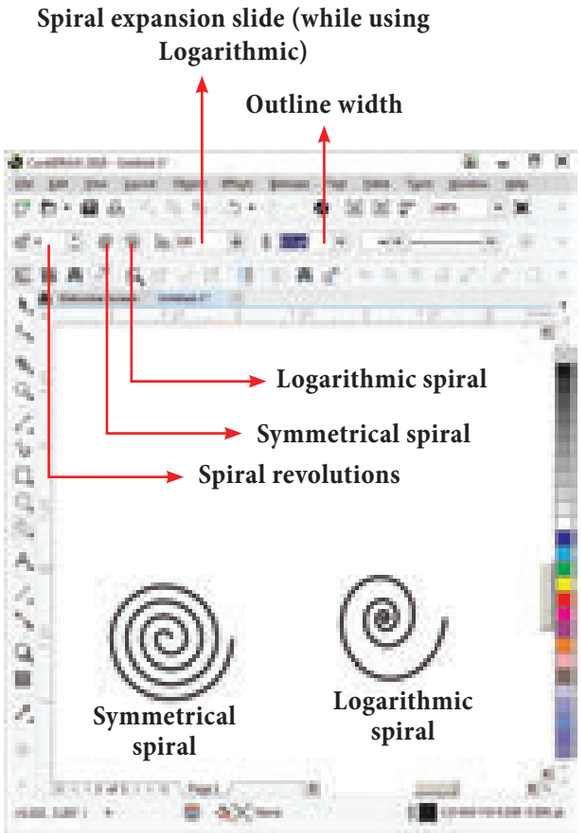

Fig 3.26 Symmetrical spiral and Logarithmic spiral

The objects you can create may have between 1 to 100 revolution, each of which is equal to one complete rotation around its center point. The direction of the revolutions is set according to the click and drag action during creation of the initial shape, as shown below.

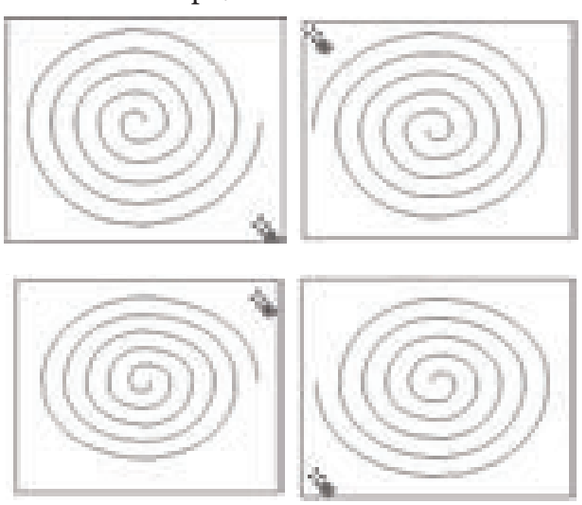

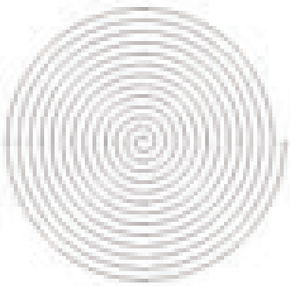

Fig. 3.27 The direction of your spiral revolution is determined by your click – drag direction.

13 Spiral revolutions

Drawing Grids

Using Graph Paper tool, you can draw a grid and set the number of rows and columns. A grid is a grouped set of rectangles that you can break apart.

To draw a grid,

1. Click and hold the **Polygon tool**. A flyout menu will appear.
2. Select the **Graph Paper** tool from the flyout menu.
3. Now type values in the top and bottom portions of the Columns and rows box on the property bar.

   The value you type in the top portion of the Columns and rows box specifies the number of columns; the value you type in the bottom portion specifies the number of rows.
4. Click on anywhere in the drawing area where you want the grid to appear.
5. Drag diagonally to draw the required grid.

   If you want to draw the grid from its center point outward, hold down **Shift** key as you drag; if you want to draw a grid with square cells, hold down **Ctrl** key as you drag.
