5.6 The Flash workspace

The Flash CS6 workspace includes a variety of tools and other components that you work with to create Flash applications.

5.6.1 Flash Window Components

The Flash window is divided into four main components. They are

1. Stage and Pasteboard
2. Timeline
3. Tools panel
4. Property Inspector

5.6.2 The Stage and Pasteboard (work area)

The white rectangle area in the middle of your workspace is called the **Stage**.

All the animations, objects and scenes for a Flash movie are created, edited, placed and played back in the stage.

As with a theater stage, the Flash Stage is the area that viewers see when a movie is playing. The term movie refers to Flash-created movies.

It contains the text, images, audio and video that appear on the screen. You can resize the Stage. By default, the Flash Stage appears **white**, but, you can change its background color from the **Document settings** dialog box using the **Modify > Document (Ctrl +J)** command. To change the view of the Stage, Zoom in and out. To help in positing the items on the Stage, you can use the grid, guides and rulers.

The gray area surrounding the Stage in Flash is the **Pasteboard**. You can create
