In the Home tab of the Ribbon, Draw, Modify, Annotation, Layers, etc. panels are displayed.

Some panels such as Draw, Modify have more buttons than shown. These panels can be expanded to display more tools. You can see an arrow to the right of a panel title. When you click on the arrow, it expands the panel to display additional tools and controls. By default, an expanded panel closes automatically when you click or move to another panel. To keep a panel expanded, click the push icon in the bottom-left corner of the expanded panel.

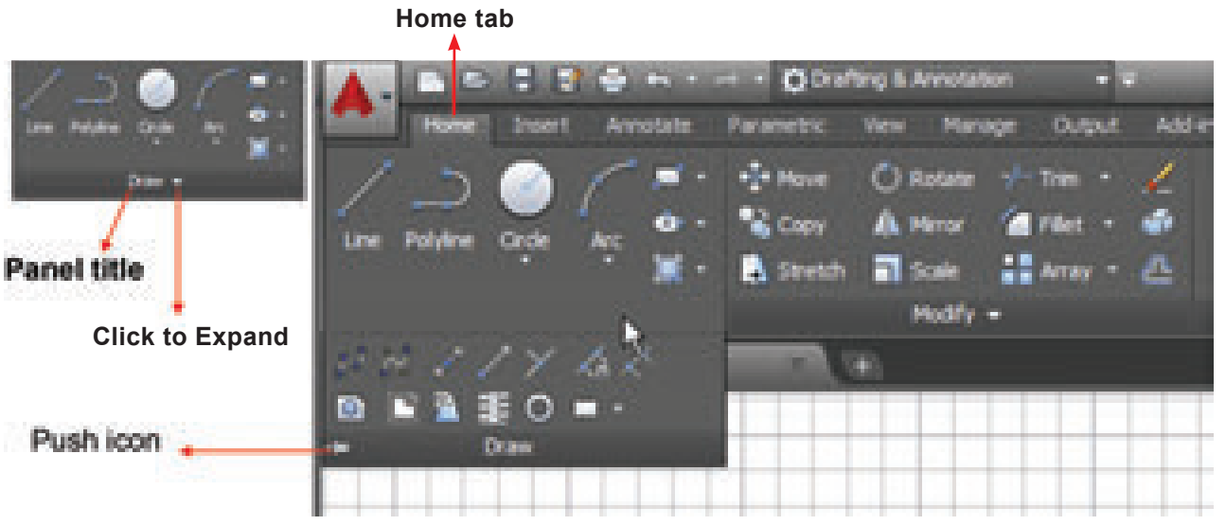

Fig. 6.15. An expanded Draw Panel

For some commands, there are many options. AutoCAD put all the options in the same button as shown in Fig. You can easily access these options.
