To erase an object,

1. Start the ERASE command by choosing **Home tab > Modify panel > Erase tool**. (or) Type **ERASE** (or) **E** in the Command line.

   Now the cursor changes from the crosshairs to **a little square**. This is called the **pickbox**. Its appearance indicates that AutoCAD is ready for you to select objects on the screen. Also note the command line; it's prompting you to select objects.
2. Place the pickbox on one of the objects, and click that object to be erased, and the object is faded in a light gray line weight.
3. Continue selecting all of the objects to be erased. The erased objects remain in a light gray line weight until the command is completed.
4. Press <**Enter**> or **right-click** to erase the objects. The objects are erased, and the ERASE command ends.

Three Types of Erasing Methods

There are three methods to erase (delete) objects from the drawing.

Method 1

Select the **Erase command** first and then select the objects to be erased.

Press **Enter** Key and the objects selected will disappear.

Method 2

Select the object to be erased.

Press the **Delete** Key.

Method 3

1. Select the object to be erased.
2. Press the right Mouse button.
3. Select Erase from the Shortcut Menu using the left mouse button.

Note: If you want the erased objects to return, select the Undo tool from the Quick Access Toolbar. This will Undo the last command.
