- Type the number of copies you want in the **Copies** text box.
- You can choose whether to **collate** the pages or not. Suppose you want to print 4 copies of a 5 pages document.

If the **Collate** option is not selected. PageMaker will first print 4 copies of page 1, then 4 copies of page 2, and so on.

If the **Collate** option is selected, PageMaker will print a complete set of pages 1 to 5, then a second set, and so on.

3. After choosing from the options in the **Print Document** dialog box, click **Print** button to print the document. Make sure the printer is switched on.

POINTS TO REMEMBER

- Desktop publishing (abbreviated DTP) is the creation of page layouts for documents using DTP software.
- Some of the popular DTP software are **Adobe PageMaker, Adobe InDesign, QuarkXPress**, etc.
- Adobe PageMaker is **a page layout software**. It is used to design and produce documents that can be printed.
- The area outside of the dark border is referred to as the pasteboard.
- Editing means making changes to the text. When you edit a document, you revise its text.
- A text block contains text you type, paste, or import. You cannot see the borders of a text block until you select it with the pointer tool.
- A Text block can be connected to other text block so that the text in one text block can flow into another text block. Text blocks that are connected in this way are **threaded**.
- The process of connecting text among Text blocks is called **threading text**.
- Text that flows through one or more threaded blocks is called a **story**.
- Any text or object that you place on the master page will appear on the entire document pages to which the master is applied.
- Master Pages commonly contain repeating logos, page numbers, headers, and footers.
- A master item cannot be selected on a document page.
