- Press **Ctrl+Spacebar** or **Ctrl+Alt+Spacebar** to temporarily access the Zoom tool and zoom in or out.

2. 11 Navigating Pages

When we create a layout for a book, magazine, or brochure, we create a document that has multiple pages.

Spreads are two pages that face each other; a left page and a right page in a multi-page document.

For navigating to pages or spreads in our document we have a variety of methods.

1. The **Go to Page** command in the **Layout** menu gives us the option to go to the page to which we want to go.
