Exercise

1. Draw a Cylindrical Equal-Area projections for the whole globe with a reduced earth radius of 3 cm and the latitudinal and longitudinal interval at 30^0 .
2. Draw a Cylindrical Equidistant projections for the whole globe with a reduced earth radius of 3 cm and the latitudinal and longitudinal interval at 20^0 .
3. Draw Polar zenithal equal area projection for the Southern hemisphere with a reduced earth radius of 3 cm and the latitudinal and longitudinal interval at 30^0 .
4. Draw Polar zenithal equi distant projection for the Southern hemisphere with a reduced earth radius of 4 cm and the latitudinal and longitudinal interval at 15^0.
