UNIT
11

Thematic Mapping

Unit Overview

11.1 Introduction
11.2 Thematic Map
11.2.1 Dot method
11.2.2 Choropleth method

Learning Objectives

- *Enhance the knowledge about thematic mapping.*
- *To understand the concepts of thematic maps.*
- *Realise the importance of the thematic map – Dot and choropleth.*
- *To interpret a Dot and choropleth map.*
- *Learn and practice dot map and choropleth map.*

RDNVSH

11.1 Introduction

A thematic map is a map that emphasizes a particular theme or a special topic such as the average distribution of population of an area. It is different from general reference maps because it does not just show general features like rivers, cities, political subdivisions and highways.

11.2 Thematic Map

These thematic maps use a variety of cartographic symbols to depict the spatial pattern of a particular geographic quality or quantity .

DO YOU KNOW?

In 1854, John Snow, a doctor from London created the first thematic map used for problem analysis when he mapped cholera's spread throughout the city.

Thematic maps emphasize spatial variation of one or a small number of geographic distributions. These distributions may be physical phenomena such as climate or human characteristics such as population density and health issues.

Thematic maps are used to display geographical concepts such as density, distribution, relative magnitudes, gradients, spatial relationships and movements.
