

Simple line graph

Polygraph

Polygraph is a line graph in which two or more variables are shown by an equal number of lines for an immediate comparison, such as the growth rate of different crops like rice, wheat pulses or the birth rates, death rates and life expectancy or sex ratio in different states or countries. A different line pattern such as straight line (__), broken line (---), dotted line (.....) or a combination of dotted and broken line (.-.-.-) or line of different colours may be used to indicate the value of different variables.

Example 12.2

Construct a polygraph to represent the data as given in Table 12.2.
