II. Very short answer

11. List the factors influencing the distribution of population
12. Calculate the doubling time of world population if the growth rate is 1.09%.
13. Mention the four reasons for low density of population.
14. What is the sex ratio of India according to census 2011? Which three states/Union Territories have favourable sex ratio in India?

III. Short answer

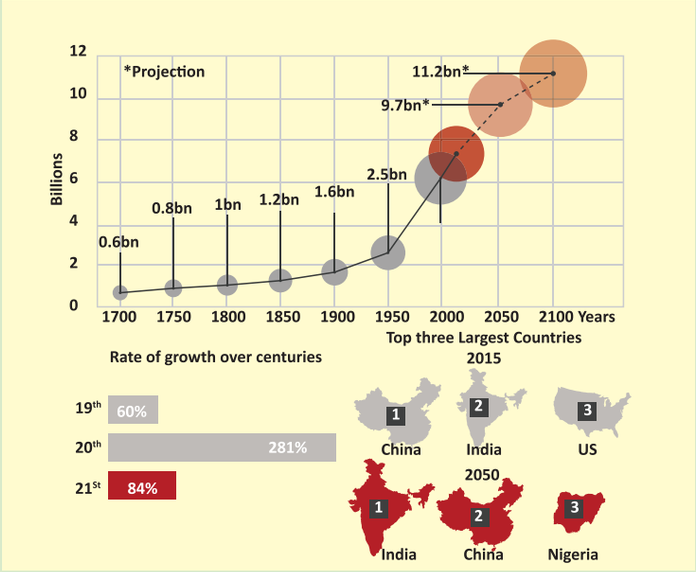

15. Given below is age structure of India and calculate the dependency ratio of India. Write an inference out of the result you get.

Age structure	Percentage
0-14 years	27.34%
15-64 years	66.42 %
65 years and over	6.24% (2017 estimate)

16. Mention any three differences between expansive population pyramid and stationary population pyramid.
17. Name six Indian states which account for about 70% of all illiterates in India.
18. Differentiate push factor from pull factor as cause of migration.
19. Define the physiological density of population.

IV. Answer the following in detail

20. Read the diagram given below carefully and answer the following questions.

a) What will be the world population by the year 2050 and 2100? How would it affect demand for fresh water?
