```
# flat scope:
obj.instance_eval do
  @attr = a_variable
end

obj.an_attribute # => 100
```

For more information, see page 83.

Ghost Method

Respond to a message that doesn't have an associated method.

```
class C
  def method_missing(name, *args)
    name.to_s.reverse
  end
end

obj = C.new
obj.my_ghost_method # => "dohtem_tsohg_ym"
```

For more information, see page 57.

Hook Method

Override a method to intercept object model events.

```
$INHERITORS = []
class C
  def self.inherited(subclass)
    $INHERITORS << subclass
  end
end

class D < C
end

class E < C
end

class F < E
end

$INHERITORS # => [D, E, F]
```

For more information, see page 157.
